

# Bowl Away Instructions

Any number of players

---

Roll the dice and remove pegs that equal the number rolled. You can remove single pegs or several pegs as long as the total equals the number on the dice. Keep rolling the dice and removing the pegs until you can no longer remove any pegs.

This is a good game for children learning number combinations since they may have to find different number sets to equal the dice roll.

Your score is determined by the number of pegs removed. Each player takes a turn, the game continues for 10 rounds. The winner is determined by the highest total score.

Score as follows:

10 pins removed 20 points

9 pins removed 15 points

8 pins removed 8 points

7 pins removed 7 points

Etc.
